

AV to DV via the USB

Holdan Limited this month announced that they are going to be shipping the GrabBee III audio/video grabber from manufacturers VVmer. The GraBee III is the bridge between your Computer and your Analogue Camcorder, Camera, VCR or other analogue audio/video application.

This tiny plug & play device, which is small enough to fit in the palm of your hand, provides you with both S-Video and Composite inputs and connects directly to your PC or Notebook via the USB (1.0) port; allowing you to capture your analogue footage straight to the Hard Drive in a digital format. The GrabBee III, which supports NTSC, PAL and SECAM formats also comes complete with Ulead Video Studio to allow you to edit your video, add titles and effects and save your finished piece as either an AVI file or an MPEG file ready for burning on to CD. Other features of the GrabBee include stereo audio input to ensure A/V synchronisation, up to 30 frames per second motion capability, pre allocated memory to speed up capture performance and much more.

The GrabBee III is available now for around £69.95 including VAT. For further details and stockists please contact Holdan Limited on 0845 130 4445 or visit www.holdan.co.uk.
