

Datavideo launch TBC-7000

Holdan are now shipping the TBC-7000 – the latest addition to Datavideo’s already comprehensive collection of Time Base Correctors. The TBC-7000 is a digital full frame synchroniser that replaces all sync signals from the source, resulting in clean transfers and clear copies.

In addition, the TBC-7000 features a dual layer 16-colour chroma key with level calibration (to memorize the settings) making it simple and easy to create videos with two special effects layers. Other features include internal dual frame synchronisation with full frame memory, two channel colour bar pattern generator, wide bandwidth – 8 bit video resolution, YUV 4:2:2 sampling rate and much more.

The TBC-7000 is available for around £899.95 including VAT. For further details and stockists please contact Holdan Limited on 0845 130 4445 or visit www.holdan.co.uk
