

Press Release

Whatever Format You Work In ...

Following the success of the popular Datavideo SE-800 four-channel analogue and digital mixer, Holdan are pleased to announce the arrival of its baby brother – the Datavideo SE-800AV; a four channel Composite, S-Video and Component mixer that can be upgraded with DV inputs on one or more channels. A DV output as well as an SDI overlay & output board can also be added – allowing you to create a bespoke four- channel mixer that is perfectly suited to both your needs and your budget.

Featuring everything that you would expect from a professional level AV Mixer, the SE-800 boasts a full size control panel, joystick positioning control, 30 programmable “hot keys” and 50+ digital effects including wipes, transitions, fades, dissolves etc. On the audio side it has a four channel stereo mixer with stereo microphone and earphone connections plus an audio output level LED indicator on the front panel - you can be assured that the SE-800AV will fulfil the demands of even the most demanding professional and industry users.

Priced at around £1950, the SE-800AV is ideal for the education and the public sector market, video DJ’s, AV companies, religious organisations, businesses and any one else who requires a reliable and affordable AV/DV mixing solution. For more information on the SE-800AV please call Holdan on 0845 130 4445 or visit www.holdan.co.uk.
