Features

The perfectly matched storage solution for your Atomos recorder

AtomX SSDmini was custom made for the new Atomos Ninja V monitor recorder and is perfectly compatible with all the other available recorders. The AtomX SSDmini is 20 percent smaller than the average SSD (to fit the small footprint of the Ninja V), has sustained read speeds of 540 MB/s and write speeds of 500 MB/s, captures CDNG up to 4K 30p, ProRes RAW HQ 5.7K up to 30p, plus 4K 60p and 2K 240p, sports a SATA III connector and supports Stable Stream™ technology to never miss a frame.

MADE TO LAST

Whether you are shooting in the desert or the snow-packed mountains, the AtomX SSDmini is your reliable partner. It's tough, likes it rough and is made to last. Also, the AtomX SSDmini comes with great endurance to accompany you on your creative journey and to ensure constant performance.

IS YOUR PASSPORT STILL VALID?

We sure hope so, since the AtomX SSDmini is made to travel. Its rock-solid build makes it shock, temperature, X-Ray and magnetic proof, so wherever you decide to bike, hike, climb or fly, our SSDmini will be a perfect travel companion.

FITS RIGHT IN

The Atomos Master Caddy guide rail system guarantees perfect docking to the SATA port. And yes, you can even use the new AtomX SSDmini with the entire Atomos range of Ninja and Shogun devices, plus—with the use of an [adapter handle](#) (optional), even the Sumo19, Sumo19M and Shogun Studio.
