

Atomos USB to Serial Cable

ProdCode: AOATOMCAB004

Calibration cable to connect with optional X-Rite calibration unit

[\[Download Images\]](#) (.zip file)

Features

The Atomos USB Type-A to Serial LANC Calibration Cable allows you to connect virtually any Atomos monitor or monitor/recorder to a computer for use with select calibration systems. When using the Atomos calibration software, which is provided as a free download for Windows and Mac on the Atomos website, this cable can be used with the X-Rite i1 Display Pro calibration hardware. You can also use optional third-party calibration software, in which case the cable can be used with any calibration hardware compatible with that software, such as Datacolor Spyder systems in many cases. The cable features a USB Type-A connector on one end and has a 2.5mm LANC connector on the other end, making it compatible with almost every Atomos monitor. The cable measure 6.5' long.

- Calibration cable to connect with optional X-Rite calibration unit
- Compatible with Most Atomos Monitors
- Use with Atomos or Third-Party Software
