The PE6324L PDUs are low-profile units featuring 24 AC outlets, coming available in various IEC or NEMA socket configurations. This series has a smaller input region on the PDU to provide more installation space for data centers.

The PE6324L eco PDUs offers remote power control with real-time power

measurement - allowing users to monitor the power status of devices attached to the PDUs, either at the PDU device or Bank level, from practically any location via a TCP / IP connection. The power status of each outlet can be set individually, allowing users to switch each device On / Off.

This series supports any 3rd party v1, v2 & v3 SNMP Manager Software and ATEN eco DC (Energy & DCIM Management Web GUI), delivering an easy method for multiple device management while offering an intuitive and user-friendly GUI that allows users to configure a PDU device and monitor power status of the equipment connected to it.
