- Supports SSO
- Video preview windows
- Media player
- NDI audio re-insertion

Enterprise grade NDI® routing. And so much more

Central 2.0 ushers in a new era of NDI® routing control. Browser-based with SSO support, smart grouping of NDI® receivers, real-time NDI® routing, media playback engine, and support for thousands of sources, Central 2.0 is your ultimate NDI® management tool.

Smart Grouping

Group NDI® decoders together to easily manage content distribution to multiple receivers.

Central. De-Centralised

Central 2.0 is browser based so you can access anywhere on your network.

SSO

Central 2.0 supports SSO to make life easy when working in an enterprise environment.

Video preview windows

The video previews allow interactive browser based monitoring and switching of sources making Central 2.0 a great option for pre-switching sources on large events and live shows.

NDI Routing. 3 clicks

At its core Central 2.0 is an NDI® routing application. Route NDI® video across your network easily by selecting a source, a destination device, or a group, and hitting connect.

Media player

The built-in media player uses an insanely low amount CPU power, regardless of playing the file back once or looping 24/7. It achieves this by pre-rendering sources to NDI so when you play them back they are already natively NDI.

NDI audio re-insertion

Select any NDI® video source and join it with a separate audio source to create a new mix. great for creating sub mixes for distribution in venue or remotely via BirdDog Cloud and works seamlessly with BirdDog Dante NDI Bridge software.
