Features

- Switchable between SD, HD and 3 Gb/s SDI
- 8 outputs automatically match the SDI video input
- Auto detection of HD or standard definition inputs
- SDI Re-Clocking
- ASI Support
- 12V universal power supply included with international socket adapters for all countries

Ideal for connecting the same signal to several devices at once. SDI distribution has an SD, HD and 3Gb/s auto switching input and provides 8 re-clocked outputs. It even handles ASI. It also supports ancillary data and embedded audio.

High Quality SDI

Mini Converters are built to the highest quality standards with low SDI jitter. You get the longest SDI cable lengths combined with ultra low noise analogue video and audio for a true broadcast quality solution. You also get the latest broadcast technology such

as re-clocking and 3 Gb/s SDI.

New 3 Gb/s SDI Technology

With the latest 3 Gb/s SDI technology built into Mini Converters you get modern broadcast technology that's future proof.

International Power Supply

Unlike other converters, a high quality low noise universal power supply is included with international socket adapters for all countries. To stop power accidentally being disconnected, a cable tie point is included to lock down the power connection tight and secure.
