- Intel Core i5 series processor and above recommended
- Touch enabled device recommended

NDI® Distribution Made Easy

BirdDog Central Lite is a software platform set to redefine the way we think about driving content to TV screens. By teaming up Central Lite with any NDI® source, including all BirdDog hardware capable of creating NDI® sources, you can now drive your NDI® streams to any BirdDog Studio NDI or Mini to decode NDI® back to SDI or HDMI.

Three clicks

Simply select your source, select your destination, and click apply. Now you are sending your NDI® content to a single BirdDog hardware decoder or any of your groups.

Unlimited Sources. Two Destinations

Central Lite supports unlimited Full NDI® sources and two BirdDog hardware destinations.

Touchscreen. Make your life easy

Every second counts in the fast paced world of live production. By using a Windows 10 Pro enabled touchscreen tablet the show director has direct lines of communication to the camera operators at their fingertips.

100% Free

Simply log your details on the [BirdDog website](#) and they'll send you Central Lite for free.
