

Cokin Z-Pro (L) Nuances Extreme Grad ND8 Hard

ProdCode: COKIN10892

Hard Graduated Neutral Density Filter ND8 (3 f/stops) in highly resistant mineral glass

[\[Download Images\]](#) (.zip file)

Features

NUANCES Extreme filters are made of a highly resistant mineral glass, able to resist accidental fall and introducing innovative technology. A new coating process ensures an uniform density and a nano metallic alloy is applied on both side of a highly resistant tempered glass, resulting in a stunning neutrality. Nuances Extreme Hard Graduated ND8 filter allows up to 3 f/stops of light compensation with a very short transition (“hard”) close to the center of the filter. Therefore the maximal exposure compensation of the filter (3 f/stops) is available on almost the half surface of the glass. Round corners and 2mm thickness makes Nuances Extreme filters easier to insert in extreme conditions. COKIN recommends the use of the NX-Series 100 filter-holder to ensure an efficient light-leaks protection and the reduction of vignetting issues with the NUANCES Extreme range of filters in L size (a filter frame of the NX-Series range is necessary). Nuances Extreme filters in L size are also compatible with existing Cokin Creative or EVO filter-holders in L size (Z-Pro Series).

- Hard Graduated Neutral Density Filter ND8 (3 f/stops) in highly resistant mineral glass
- 3-Stop Graduated Neutral Density Filter

- Highly resistant mineral glass
- Nano-Metallic Alloy coating resulting in a stunning neutrality

In the box:

- Nuances Extreme glass filter
 - Filter pouch
