- Easy Control and Monitoring via Ethernet
- Synchronize Multiple Units via HDMI or IP

The Best Prompter for Conference

The Datavideo TP-800 MARK II teleprompter stands out as the premier choice for conferences, offering unparalleled functionality and ease of use.

The TP-800 MARK II conference teleprompter kit is designed for corporate conferences or other events where a speaker is addressing an audience. From the audience's perspective, the high-quality prompter glass is transparent, giving the impression that the presenter is speaking fluently and professionally without any

assistance. From the presenter perspective, the glass displays a mirror image of the pre-prepared speech from the LCD monitor at the base of the stand.

Stand-alone, Free Adjustment

TP-800 MARK II is both easy to set up and easy to operate. Once set up, the TP-800 MARK II can stand completely on its own and can be freely adjusted in height and viewing angle.

Allowing Performers to Focus on Their Best Performance and Ensure the Event Runs Smoothly

TP-800 MARK II uses high quality mirror-reflective glass, which looks like an ordinary piece of clear glass from the audience's perspective, but perfectly reflects the prepared script displayed on the LCD screen below the Teleprompter.

Clear Display for Any Situation

With a hood, the strong light effect of the surrounding environment can be avoided, always maintain a clear script display.
Optionally, the top case of the teleprompter is easily removable for convenient access.

Easy to Carry and Durable

All components housed in a sturdy, portable case that can be set up in just a few minutes. Supports mains or V-Lock battery power.

Built in Teleprompter Application

The TP-800 MARK II features a bright 15" 4:3 LCD screen with the powerful dvPrompter Plus application built in, there is no need to run software on a laptop.

Easy Control and Monitoring via Ethernet

Control and monitor the prompter over a local network using any device with a modern web browser, Load, reload and control scripts over a local network.

Synchronize Multiple Units via HDMI or IP

Connect multiple TP-800 MARK II together using the HDMI input and output or use IP synchronisation over Ethernet.

The HDMI input also allows the 15" LCD screen to be used as a HDMI monitor with third party software if required. The HDMI output can also be used to drive external

displays.

Powerful Rich Text Editor

You can remotely change the font size, type, colour and justification on a per script basis and even use multiple different fonts within a single script.

The editor also has support for embedding images and creating playlists from multiple scripts.

Supports PowerPoint and Keynote slides*

In addition to text-based scripts you can now import your Powerpoint or Keynote presentation slides via the web interface, slides can be controlled using the hardware WR-500 control or the web based remote control interface. dvPrompter Plus supports seamlessly switching between text-based scripts and slides, you can even add slides and text-based scripts to a playlist.

dvPrompter Plus supports mirroring slides in real time so your content is the right way around even when viewed via the mirror glass.

Real Time Editing*

Interrupt live broadcasts with breaking news or urgent updates, simply modify the script via the web interface and watch it update in real time.

HDMI Input

In addition to having the powerful dvPrompter Plus application built in, the TP-800 MARK II also features a HDMI input port with hardware mirroring allowing you to integrate the hardware with any third-party software, you can even use the HDMI input as part of a playlist.

Optional Hardware Controllers

The TP-800 MARK II can also be controlled using our WR-500 handheld remote, FS-30 Foot Pedal or any generic presentation remote with a USB receiver. Optionally you can connect the Contour Shuttle Xpress to the IP connected computer for even more subtle control.
