Datavideo's TVS-1000 is a total studio system.

The TVS-1000 is a 5 in 1 design which consists of trackless virtual studio system, video switcher, character generator, video recorder and web streaming encoder. It's a versatile, easy to use and cost-effective solution.

TVS-1000 is suitable for production companies, corporate producers, users in education, small studios and TV stations.

As a virtual studio solution, TVS-1000 supports pan, tilt and zoom camera movements for dynamic effect. The built-in Virtual Set Maker allows users to fully customize their sets: background images can be inserted with ease, logos can be added to any surface and video can be run in the backdrop.

In addition, professional studio templates can be downloaded.

Professional virtual studio with only one video camera

TVS-1000 provides a professional platform for users to create and present unique and compelling video productions within minutes. For multi-layered results, 2 DSK in TVS-1000 to include CG and animation to every scene.

30 free sets with variety of virtual studios

TVS-1000 comes pre-installed with 20 virtual scenes. Each scene is designed with four different view angles, which makes the virtual studio more real, and flexible.
