

Datavideo VoiceTRX100

ProdCode: DATAVOCETRX100

Voice Tracking Control Interface

[\[Download Images\]](#) (.zip file)

Features

- Voice Tracking Control Interface
- **Automated Camera Movement**
Using ceiling microphone voice detection, the VoiceTRX100 automatically switches and moves cameras to focus on the active speaker, eliminating the need for a camera and switcher operator
- **Clean Switching**
Primary and secondary camera placements allow for clean switching without seeing any camera movement. Our KMU-100+ with unique ROI (regions of interest) feature provides instant switching to an active speaker
- **Simultaneous Streaming and Video Conferencing**
Output high quality video to a large display or projector while simultaneously streaming and integrating with video conferencing applications such as Zoom, Teams and Google Hangouts
- **Seamlessly Integrate AI Auto Tracking Cameras**
Datavideo offers a wide range of PTZ cameras for various applications and venue size. A Datavideo Auto Tracking camera uses AI technology built into the camera, so no software or external device is needed to activate this

Automated Video Conferencing Solution

Bring automated broadcast quality production to video conferencing with the VoiceTRX100. The VoiceTRX100 allows Datavideo's professional PTZ cameras and video switchers to be voice activated, bringing the full multi-camera studio experience to meetings, town halls, council chambers and classrooms.

Clean camera switching, and movement is triggered automatically based on the location of the active speaker. Broadcast style cuts combined with lowerthirds for displaying the active speakers' names provides the best possible viewer experience.

The VoiceTRX100 supports Datavideo's conference switchers and cameras, this diverse range of hardware support allows us to cater for a broad range of applications and budgets, from small meeting rooms to council chambers and conferences.

VoiceTRX100 Solutions for any Application

The award winning VoiceTRX100 takes voice positional data from active speakers in a room from ceiling microphones and gooseneck microphones to automate PTZ camera movement and seamlessly switch using Datavideo conferencing solutions.

Both setups incorporate VoiceTRX100, ensuring automated, speaker-centric video operation for a seamless meeting experience.

VoiceTRX100 supports Datavideo's switchers and cameras
