Bringing professional quality control to your studio

The only independent desktop control surface with a powerful onboard processor, and with configurable high-definition buttons all powered by POE+.

ProDeck combines powerful embedded computer technology with the latest tactile touchscreen interface to put you in complete control of the broadcast, inspiring your

creativity and producing stunning results.

ProDeck can be fully customised with your favoured choice of LINUX or Windows applications and has the power to seamlessly switch between heavyweight tasks, such as content streaming and multimedia editing.

One cable, one connection

ProDeck is powered with a single Ethernet cable for easy installation and cost effective operation. Simply plug into your network and you're ready to get to work.

Feel don't just touch

ProDeck features the latest in tactile touchscreen technology, with each of its fully customisable buttons precision engineered to emulate real-life buttons, enabling you to switch between Apps while continuing to focus on your work.

Smart buttons

The dual-purpose buttons on the ProDeck do not only function as controls, they also provide real-time video previews, enabling you to accurately identify and easily switch between Apps.
