USB Audio Interface and DSP Mixer for XLR Microphones

[\[Download Images\]](#) (.zip file)

Features

- USB Audio Interface and DSP Mixer for XLR Microphones
- Drive any XLR mic with a massive 80dB gain
- Enjoy loud, clear amplification for any headphones
- Shape your voice with onboard effects like Voice Tune, Compressor, and Equalizer
- Wave FX Processor unifies DSP effects and VST Inserts in one signal chain
- Experience ultra-low-latency monitoring like never before
- Set the perfect mic gain automatically with Auto Gain Wizard
- Adjust levels and mute instantly with a touch
- Get instant visual feedback with customizable LED lighting
- Control Wave XLR and your whole setup with Stream Deck
- Route audio, chain effects, and mix with Wave Link software

Wave XLR brings pro audio to your desktop. Plug in any XLR mic and get up to 80dB of clean gain—no booster needed. Set gain automatically and mute with a touch.

Loud, clear headphone output keeps you dialed into your mix while customizable LED

feedback shows your levels at a glance. At the core, Wave FX Processor runs Clipguard 2.0, DSP effects, and VST inserts to keep your signal pristine.

Everything flows through one unified signal chain for ultra-low latency monitoring, while Wave Link software lets you route and mix like never before.

In the box:

- Wave XLR MK.2
 - USB-C to C cable (150 cm | 59 in)
 - Quick Start Guide
-
