Features

- HDMI-to-USB capture
- Capture 1080p video from any HDMI camera
- Powered over USB
- High-quality audio capture
- No driver installation required

HD video capture made easy

Epiphan AV.io HD+™ brings USB plug-and-play convenience to your HDMI sources. You can easily capture 1080p video from any HDMI camera or device with nearly zero latency, bringing in audio through HDMI, the 3.5 mm input, or both. This card is compact and based on tough-as-nails technology that's even been used in space, so you can confidently carry it wherever there's video to capture.

Make video capture effortless

With AV.io HD+, capturing video from HDMI and DVI devices on Windows, Mac, or

Linux is as easy as using a plug-and-play webcam. Just connect your device to one end of the capture card and your computer to the other, then select your device as a source in your software. That's all there is to it – no driver installation required.

Size and scale effortlessly

There's no need to think about video scaling or aspect ratios with this capture card. AV.io HD+ will automatically adjust your image based on the software you're using, delivering superior video quality even when swapping between sources.

Elevate your favourite apps

You can use AV.io HD+ with any program that accepts USB as a video source. That includes video conferencing apps such as Zoom and Microsoft Teams as well as streaming software like Wirecast and OBS.

Take your capture card with you

AV.io HD+ is light and compact. It's powered over USB, which means one less adapter to carry around. And with its rugged all-metal exterior and durable connectors, it'll stand up to repeated, long-term use.

Capture great audio

With high-quality audio capture and more ways to bring audio into your projects, AV.io HD+ ensures your content will sound as great as it looks.

- **Bring in your audio**

Capture audio directly from your HDMI source, or through the 3.5 mm input to capture from a mixer or other external source. You can even bring in audio from both inputs simultaneously.

- **Minimize noise**

Whisper-quiet performance makes AV.io HD+ a silent addition to your workflows, meaning it won't add noise or distract from the task at hand.
