- Wide Angle Lens - 124° Field of View
- Plug and Play
- USB 3.0
- Built in Beamforming Dual Microphone Array
- Adjustable Clamp Mount with 1/4-20 Mounting Insert
- Automatically Frames Participants
- 5-Year Warranty

Expect More from your Webcam

With an ultra-crisp 4K sensor, this is the webcam to take your video conferencing and live streaming projects to the next level. Want to pan, tilt and zoom with a webcam? No problem! Capture beautiful video in 4k and zoom just like a broadcast PTZ camera with lossless digital zoom.

Create digital EPTZ presets to recall at the click of a button with the included IR remote. Also included in its sleek design is an array microphone, making this a complete solution.

A Webcam That Can Zoom In

Imagine the possibilities of a webcam with these features. For those hosting YouTube or Facebook Live shows or instructional videos, the opportunities are limitless. Share your expertise with the world!

Create engaging video recordings for online presentations and live streams, the HuddleCamHD 4k EPTZ is the perfect webcam for:

- Presentations
- Teaching / Lectures
- Esports
- Fitness Classes
- Cooking demonstrations

A Solution for Individuals and Businesses

Whether you're a sole proprietor running a business, part of a remote video production team, or an individual who just wants greater video conferencing and production capabilities, the HuddleCamHD 4k EPTZ webcam is ideal. This plug-and-play solution is a great addition in all scenarios.

Simple Camera Controls

Take control of your camera with the included IR remote, perfect for framing your look on a video call or producing a live stream. This camera even supports Zoom PTZ camera controls for Zoom Rooms and Far End Camera Control. And, the PTZOptics Camera Control app also supports our EPTZ cameras.

Easy Setup

Finding the perfect place for your 4K webcam is easy. Simply clamp this webcam to any monitor for meetings or attach this camera to a tripod to set up for recording awesome 4K video or live streams. Want to mount this camera permanently in a meeting space? We suggest the [HCM-1-BK](#) wall mount.

A Turn-Key Solution

Truly a “future-proof” solution that's hard to beat. Ultra-HD lens? Check. Dual-

microphone array? Check. Plug and Play USB 3.0? Check!

Go Live Online

Let the 4K video sensor go to work for you, taking your video productions to the next level with easy controls anyone can use. Use this camera directly with Facebook or YouTube live with no need for additional software. Or, this camera also works with all the best video production software including OBS, vMix, xSplit, Livestream Studio, Wirecast, and eCamm live.

Ultra HD Video

A large UHD CMOS image sensor and camera lens make close-up details more realistic on video. Whether recording a video, live streaming, or video conferencing details will look crisper and sharper than 1080p webcams.

Auto-Frame Meeting Attendees

Turn on auto-framing so the camera automatically uses EPTZ presets to frame subjects in view. This new “auto-framing” feature takes full advantage of the 4K image sensor and applies intelligent decision-making. The camera calls PTZ presets based on the location of moving objects. This feature is designed to work in meeting room environments.

Remote Camera Control

Want to give a friend or co-worker control of your PTZ camera functions through video conferencing software like Zoom? Just enable the Far End Camera Controls. If your video conferencing software supports UVC, you can give pan, tilt, and zoom controls of your camera to anyone in the world. This also works with ZoomRooms.

Universally Compatible

All HuddleCamHD cameras have been designed for plug-and-play compatibility with web-based video conferencing software like Microsoft Teams, Skype, GoToMeeting, WebEX, and Zoom. Enjoy seamless integration even with live streaming applications like Facebook Live.

EPTZ – Electronic Pan, Tilt, and Zoom

With electronic pan, tilt, and zoom functionality, camera operators can simulate camera movements using digitally zoomed presets inside a 4K resolution area. EPTZ functionality can quickly cut between camera presets using an IR remote or multiple IP-

connected software and hardware solutions. EPTZ camera presets are saved locations inside the wide-angle 4K image using digital zoom with pan and tilt coordinates. This technology is even more effective because our engineers paired a wide field of view and extended focal length for up to 25 feet away.

Unrivalled Warranties

With robust warranties included standard on every product, you can trust HuddleCamHD solutions to deliver high performance from day one, and for many years to follow.

The HuddleCamHD Pro comes with a 5-year limited parts and labour warranty. HuddleCamHD stands by our promise to protect your investment by providing repairs or replacement products for the duration of your warranty.
