Teleprompter Script Controller for Prompter Pro 4

[\[Download Images\] \(.zip file\)](#)

## Features

- Teleprompter Script Controller for Prompter Pro 4
- Controls Prompter Pro 4 Teleprompter Script
- Made of Durable Aluminium
- Adjustable Speed Settings
- Plug and Play
- Three Sensitivity Presets
- USB Connectivity
- Compatible with Mac and PC

The IKAN Teleprompter Controller is specifically designed for seamless integration with Prompter Pro 4 software, offering effective control over teleprompter scripts during live broadcasts, presentations, and video productions. This device enables you to adjust the speed of the script in real time. With its USB connectivity, the controller provides a straightforward plug-and-play experience, requiring no additional software installations or complex setup procedures.

## Rotary Knob

This central feature of the IKAN Teleprompter Controller allows you to easily adjust the scrolling speed of the teleprompter script. By simply turning the knob clockwise, you can increase the speed, making it suitable for faster-paced segments, or turn it counter-clockwise to decrease the speed for slower speech. This level of control is ideal for live situations where adaptation to changing scenarios is necessary.

## **Sensitivity Adjustment**

Equipped with a “Sensitivity: Slow/Fast” button, this function lets you cycle through three distinct sensitivity levels for the rotary knob. Each level modifies how much the scroll speed changes with each turn, offering you finer control based on their preference or the specific needs of the presentation. Indicator lights clearly display which sensitivity setting is active.

## **Direct Script Navigation Buttons**

- Rewind Button: Quickly move your script back one page
- Fast-Forward Button: Skip forward one page
- Start/Stop Button: Start or stop the scrolling of your script instantly

## **In the box:**

- Teleprompter Controller
  - USB Cable
  - Instruction Manual
-
