- 1x 501 Adjustable Baseplate
- 2x 15mm PPSH Rods (8 Inches)
- 1x RF Cine Cap

The KONDOR Blue Base Rig MKII builds off of everything we've learned about camera rigging after years of working with thousands of users all over the world. At the core of the system is the camera cage. Precision machined and finished from premium materials including stainless steel hardware for rust-free reliability. Each cage is designed by filmmakers with a range of real-world use-cases in mind. NATO rail and standard ¼"-20 and ½"-16 anti-twist mounts are used throughout making additional accessory rigging simple and rigid.

The Baseplate/Bridge Plate, Top Handle, and Metal Body Cap selections have been optimized for particular camera setup. For details on each of the components, check

out the linked items above. Backed by the KONDOR BLUE lifetime warranty and personal customer service our customers rave about.

* If your top handle button is not working, make sure to change your "shutter btn function for moves" to "fully-press = start/stop mov rec" in the MENU settings and that your handles switch is set to P for Canon mirrorless cameras.
