- Caddy for Deity TC-1
- Compatible with Deity TC-1 Timecode
- Mount via built-in Mini QR plate or with two included ¼ 20s
- Protect your Deity TC-1 Timecode Box
- 35 gm/1.2 oz
- 47.5mm W x 60mm T x 31.5mm D

Deity has made accurate timecodes available for the masses. We rarely go on set without a handful of these in our kit. Mounting the Deity TC-1 timecode box, however, is a challenge. While they do include built-in Hook-and-Loop pads, these can prove insufficient when moving around the set.

We've searched the market and weren't satisfied with any of the mounting options for the Deity TC-1 timecode. So we set out to design exactly what we were looking for compact, multiple mounting options, honor Deity's features, etc. The result—a super lightweight 1.2oz, multifunctional design.

The Deity TC-1 timecode box is held in place by a fully CNC'd aluminum enclosure. Every LED indicator, button, port, and screen is fully visible. There is also an ideally placed ¼ 20 mount on the base for cable management such as the KONDOR BLUE Mondo Ties.

Mounting the Deity TC-1 timecode box is now a breeze with multiple options. To keep the design as slim as possible, we embedded our Mini QR plate. Additionally, there is a mounting slot that comes with two custom low-profile ¼ 20s. The slot is over 18mm long allowing for the bolts to be mounted to almost any cage configuration. A lanyard loop has also been machined for additional mounting/storage options..

If you've lost a TC-1 on set or struggled to find an open spot on your kit to adhere to the velcro patch, then this mount is for you.
