The Hollywood Handle's innovation came because of pure passion and extreme testing. Typically, this style of extended camera rig handle requires a tool and multiple bolts to mount and remove from the camera. We streamlined this by adding a dual NATO connection which is a signature standard of our cinema cages. By making the Back Upright Support adjustable front to back—also via NATO—the Hollywood Handle can accommodate a massive range of cameras.

The Extension segments (60mm & 20mm included with a 40mm Trigger Record Module also available) have been optimized to be able to mount in any orientation, in addition to being able to be added to the front or back of the handle. With multiple internal mounting solutions, the Hollywood Handle has the unique ability to mount a standard ARRI-style 60-tooth rosette to whichever element is on the back. This is invaluable to be able to quickly pivot the back grip via the Pro Pivot Rosette Module. With 30 locking positions, you can adjust the grip instantly to remove a battery or alter your shooting grip.

Don't need the back grip? The back rosette can be accessorized with any of KONDOR BLUE's rosette accessories. A few of our favorites include the Rosette Anti-Twist Cradle for Mini Lock Quick Release Plates, Rosette to ARRI Accessory Mount, and the Rosette to Straight Angle Rod Clamp.

Like all KONDOR BLUE products, every bolt, bevel, and curve was carefully considered and optimized for a range of shooting styles, preferences, and speed. Backed by KONDOR BLUE's unmatched lifetime warranty, the Hollywood Handle is a no-brainer addition to your kit.
