- Stainless steel bearings and hardware
- Each ball head joint can hold up to 25 lbs!
- Points of Articulation: 2
- Distance between ball-joint centers: 55.7mm/2.2"
- Weight: 5.1 oz

The Cine Magic Arm Center Clamp is the core of the KONDOR BLUE magic arm ecosystem. After years of real world usage, several updates have been made to increase functionality, longevity, and overall usability. While other arms on the market claim to have more articulation range, this is misleading as it is crucial for the rubber O-ring on the ball joints to always be in contact with each side of the clamp in order to ensure a secure hold. As such, we've designed the clamp to engage the O-ring, no matter the position. Parallel to the clamp, ball joints have 270° of articulation and +80°

of perpendicular rotation.

Weight saving measures have also been made to decrease the weight while maintaining strength and rigidity. All hardware, springs, and bearings are stainless steel to accommodate water uses as well. The tightening clamp has a built-in limiter so that the entire assembly stays neatly together making loading new arm accessories a breeze.
