

Kondor Blue Shoulder Rig MKII

ProdCode: KONSPAR2

Shoulder Rig MKII - Space Grey

[\[Download Images\]](#) (.zip file)

Features

- Shoulder Rig MKII
- Ultra-light, fully precision machined shoulder pad
- Removable/washable air inflated pad (hand pump included)
- 12+ mounting locations with anti-twist features
- Designed to be rigged in multiple configurations for comfort and utility

The Shoulder Pad Air has been redesigned from the ground up for weight savings and more rigging configurations. The updated version has cut the weight in half while maintaining over a dozen mounting locations. The beloved air-inflated shoulder pad remains unchanged, but the machined frame's hourglass shape allows for better contour and comfort, especially on your collarbone.

For those who enjoyed the nato rail adjustment on the previous version—don't worry, we thought of you as well! The center "plus sign" channels have been intentionally cut to perfectly align with the KONDOR Blue Monitor Cage NATO Rails. The Anti-twist NATO Clamp can be mounted to the bottom of the included railblock for fast and secure adjustments along the NATO rail.

The anti-twist mounts on each end of the shoulder pad are 60mm apart and can be used to mount directly to your 15mm. The center 1/2"-16 ARRI anti-twist mounts can be mounted to or through both male and female 3mm anti-twist pins. This provides an incredible way to mount the KONDOR Blue Battery Plates in a streamlined configuration. With this setup, the battery acts as an effective counterweight.

The ends of the Shoulder Pad Air are at a 45° angle and when mounted to 15mm rods via the M12 Anti-twist Mounts, it makes for the perfect gunstock-style pad. This is an awesome setup for EasyRig or handheld use.

You won't find a lighter, more comfortable, or configurable shoulder pad on the market. Pick up yours today as they're going to fly off the shelves.
