

Kondor Blue RF Lens Mount Support for Speed Boosters & Adapters

ProdCode: KONULMS

RF lens mount support for speed boosters and adapters - Space Grey

[\[Download Images\]](#) (.zip file)

Features

Compatible with our CANON and RED cage systems and popular lens adapters.

This bracket solves the issue many operators face when adapting lenses on their cameras and dealing with loose lens mounts with too much play. Designed to work on our Kondor Blue cages but may also work on other models as well. It has been tested effectively with brands such as Metabones, Canon, Wooden Camera, BOR, Revolve and more.

The bracket mounts onto the cage using the included screws. It comes with 3 different height and screw options to allow universal compatibility and prevent any movement or twisting that may occur when using a Speedbooster or adapter with your lens.

- Weight: 1.3 oz
 - Red Komodo Canon C70 R5
