[\[Download Images\]](#) (.zip file)

### Features

- Rosette side handles
- Left/Right compatible
- Ergonomic rubber grip
- Arri rosette attachment
- 3x Arri Mount
- Cold shoe
- 1/4 20 mount on bottom

Kondor Blue's rosette side handles are a rig staple these days and it's something that has been on our minds for a long time. But in true Kondor Blue fashion, we didn't want to make a dozen variants of a side handle—we wanted to create one that would rule them all. Thus, the Kondor Blue Wing Side Handle was born!

Taking inspiration from traditional pistol grips, we wanted to ensure that first and foremost the rosette side handle was comfortable. After testing several size variations we nailed an ergonomic grip that is comfortable for hands of all sizes. The contoured rubber grip features symmetrical knurling textures on each side with grooves cut out

along the back spine and is comfortable in all shooting temperatures and environments.

On top of the grip, an ARRI mount is ideally placed to work in conjunction with our Magic Arm or Mini-Quick Release lineups. On the front of the grip, you will find a 1/4-20 accessory mount and a cold shoe which would work great for mounting a lav receiver, timecode device, etc. </p>

<p>To top it all off, the grip is ambidextrous and is easily converted into a left or right handle with the need to only remove a single bolt. The side ARRI Mounts locate the rosette attachment bracket. This bracket has built-in anti-rotation pins to keep your grip from slipping. The offset distance (20mm) of the rosette bracket has been optimized to work alone or be adapted with a range of Kondor Blue rosette accessories such as our Quick-Release Rosette Mount, NATO Clamp to ARRI Rosette, and Rosette Cage Adapter to name a few.</p>
