

Logickeyboard After Effects CC - PC Backlit ASTRA2

ProdCode: LKBAECCA2PCUK

Adobe After Effects CC PC Backlit ASTRA2 Keyboard

[\[Download Images\]](#) (.zip file)

Features

The ASTRA2 Series backlit keyboard with numeric keyboard features an elegant, slim line black keyboard with low-profile scissor-switch keys for a light, yet responsive feel. With five selectable light levels, the ASTRA2 is the perfect choice for any lighting environment. The keyboard features two USB 2.0 ports to enable you to connect e.g. your mouse, contour shuttle or a USB-dongle. The ASTRA2 keyboard is developed with two USB cables. One for the keyboard itself, and one for the USB hub, at the back of the keyboard. The reason for having a separate cable for the USB hub, is to avoid problems with installations, that require a KVM extender.

The Adobe After Effect dedicated LogicKeyboard, also features all the regular letters, numbers and symbol labelling that you will find on a conventional keyboard, it can simply be used as a substitute for it. Easy to set up and use. No software required.
