200 shortcuts for Adobe Premiere Pro & Adobe After Effects - all in one single keyboard

With the 2-in-1 keyboard, designed for video editors and movie makers, who works with Adobe Premiere Pro and Adobe After Effects, filmmakers can easily switch between their editing applications and still have all the shortcuts they need right at hand.

Backlit Keyboard - The ASTRA Series

The ASTRA backlit keyboard with numeric keyboard features an elegant, slim line black keyboard with low-profile scissor-switch keys for a light, yet responsive feel. With five selectable light levels, the ASTRA is the perfect choice for any lighting environment. The keyboard features two USB 2.0 ports to enable you to connect e.g. your mouse, contour shuttle or a USB-dongle. The ASTRA keyboard is developed with two USB cables. One for the keyboard itself, and one for the USB hub, at the back of the keyboard. The reason for having a separate cable for the USB hub, is to avoid problems with installations, that require a KVM extender.

To power the keyboard, you need to plug in the grey USB connector. If you need to activate the USB hub, on the back of the keyboard, you need to plug in the black USB connector.

The Adobe Filmmaker dedicated Logickeyboard, also features all the regular letters, numbers, and symbol labelling that you will find on a conventional keyboard, it can simply be used as a substitute for it. Easy to set up and use. No software required.
