Are you tired of struggling with traditional keyboards that don't cater to your unique needs? Say goodbye to the frustration of typos and difficulty in reading. Our revolutionary Dyslexie font keyboard is here to transform your typing experience. Tailored specifically for individuals with dyslexia, this keyboard incorporates the groundbreaking Dyslexie font, carefully designed to enhance readability and relieve the challenges associated with traditional fonts. With its unique letter shapes and spacing, it significantly reduces letter swapping, making typing a breeze.

The Dyslexie font

The keyboard font is developed in cooperation with www.dyslexiefont.com. Dyslexie Font incorporates subtle yet impactful modifications to traditional letterforms. Each character is meticulously crafted, featuring heavier bottoms, enlarged openings, and increased spacing. These design elements contribute to a more distinct visual contrast between letters, ultimately reducing the risk of confusion for dyslexic readers.

Wireless and Wired connectivity

The Titan keyboard offers dual connectivity, enabling you to effortlessly switch between wireless or wired connection with just a keystroke. It is designed and optimized for use with Windows and can easily be connected to two PCs – one corded and another wireless – making it ideal to master two workstations.

Backlit and Battery powered

For the best adaptation to working in low-light environments the keys on Titan are backlit, and the illumination is dimmable in 5 levels. The Titan keyboard uses a long-lasting rechargeable lithium-ion battery for the wireless connectivity with state of the art battery life. If used without the backlight feature the Titan provides energy for months' use before recharge is necessary.
