- Battery life: up to 300 hours (without backlight)
- Battery life: up to 40 hours (with backlight at dimmest level)
- Charging time: 4,5 hours

This Logickeyboard is your number one choice when editing in Logic Pro. The shortcut commands labelled on the keys, and their colour-coded definitions make you a Master of controlling Logic Pro in no time. The Logickeyboard is ideal for music producers, audio editors, and everyone else working diligently with Logic Pro.

Why shortcut keyboards?

Skip the time-consuming menu navigation and eliminate the need for memorizing keyboard commands. A Logickeyboard visualizes all the app shortcuts you need and puts them right at your fingertips. This translates into higher productivity and more time for creativity.

Wireless and Wired connectivity

The Titan keyboard offers dual connectivity, enabling you to effortlessly switch between wireless or wired connections with just a keystroke. It is designed and optimized for use with Mac OS, but can easily be connected to an iPad or iPhone as well, or to two Macs – one corded and another wirelessly – making it ideal to master two workstations.

Backlit and Battery powered

For the best adaptation to working in low-light environments the keys on Titan are backlit, and the illumination is dimmable in 5 levels. The Titan keyboard uses a long-lasting rechargeable lithium-ion battery for wireless connectivity with state-of-the-art battery life. If used without the backlight feature the Titan provides energy for months' use before recharge is necessary.
