

## Logickeyboard Maya - Mac Alba

**ProdCode: LKBMAYACWMUUK**

Autodesk Maya CC Mac Alba Keyboard

[\[Download Images\]](#) (.zip file)

### Features

With a built-in chip made specifically for macOS®, the new ALBA shortcut keyboard is pure plug & play. No need for drivers and tedious setup. The keyboard has a built-in macOS® chip and is fully compatible with macOS.

Logickeyboard are big believers in plug & play, which is why they have gone to great lengths to build a chip that ensures easy keyboard setup.

They partnered with an ergonomic therapist to determine ALBA's optimum angle. The solution: a typing angle of 8.5 degrees with leg lift, and 4.5 degrees without leg lift. Key travel can't be too big or too small, so the new ALBA has what Logickeyboard believe is the perfect key travel: 4mm.

The scissor-Switch mechanism gives each key increased stability during typing.

Logickeyboard love convenience! That's why the wired keyboard has two built-in USB 2.0 ports.

- Autodesk Maya CC Mac Alba Keyboard
