 - Weight: 840 g ~ 29.6 oz
 - Cable length: 1.5 m ~ 59 inches

Meet ALBA - our dedicated Apple® keyboard

Most macOS users know the basic shortcuts, but macOS is loaded with hundreds of useful shortcuts that will make your everyday workflow much easier and faster. The challenge for most users is to remember these keystrokes.

Our macOS shortcut keyboard features the essential shortcuts in macOS and many more. Labeled with easy color combinations for easy access.

With a built-in chip made specifically for macOS®, the new ALBA keyboard is pure plug & play. No need for drivers and tedious setup.

The keyboard has a built-in macOS® chip and is fully compatible with macOS.

Logickeyboard are big believers in plug & play, which is why they went to great lengths to build a chip that ensures easy keyboard setup.

On-point ergonomics

Logickeyboard partnered with an ergonomic therapist to determine ALBA's optimum angle. The solution: a typing angle of 8.5 degrees with leg lift, and 4.5 degrees without leg lift. Key travel can't be too big or too small, so our new ALBA keyboard has what Logickeyboard believe is the perfect key travel: 4mm.

Scissor-Switch Keys

The scissor-Switch mechanism gives each key increased stability during typing.

Two built-in USB-ports

Logickeyboard love convenience. That's why the wired ALBA keyboard has two built-in USB 2.0 ports.
