- High quality and robustly built for professional use

- Chassis colour: Titanium Gray
- Compatible with Windows 10/11

The Adobe Photographer Shortcut Keyboard is a 2-in-1 keyboard. It works with two of the most popular Adobe applications for photographers – Photoshop CC and Lightroom CC – providing you with more than 190 shortcuts in a single keyboard. The Adobe Photographer Keyboard makes it easy to switch between the applications and still have all the important shortcuts right at hand. This Logickeyboard is your number one choice when working with image processing in Adobe. The shortcut commands labeled on the keys, and their colour-coded definitions makes you a Master of editing in no time. The Logickeyboard is ideal for photographers, and everyone else working diligently with photography and image editing.

Why shortcut keyboards?

Skip the time-consuming menu navigation and eliminate the need for memorizing keyboard commands. A Logickeyboard visualizes all the app shortcuts you need and puts them right at your fingertips. This translates into higher productivity and more time for creativity.

Wireless and Wired connectivity

The Titan keyboard offers dual connectivity, enabling you to effortlessly switch between wireless or wired connection with just a keystroke. It is designed and optimized for use with Windows and can easily be connected to two PC's – one corded and another wirelessly – making it ideal to master two workstations.

Backlit and Battery powered

For the best adaptation to working in low-light environments the keys on Titan are backlit, and the illumination is dimmable in 5 levels. The Titan keyboard uses a long-lasting rechargeable lithium-ion battery for the wireless connectivity with state of the art battery life. If used without the backlight feature the Titan provides energy for months' use before recharge is necessary.

In the box:

- TITAN Backlit and Bluetooth Logickeyboard
- USB-C to USB-C connection cable
- User guide
