As yet another edition to our wide-reaching audio portfolio, the Reaper keyboard fills a much demanded gap as many professional and hobby users have an affinity for the software. The split-key and colour-coded design creates an aesthetic and functional

layout, which combined with the backlit ASTRA2 frame makes a perfect partner for dim lit studios. With 145 shortcuts, the Reaper ASTRA2 keyboard will supply all the tools you need at your fingertips.

View all of the keyboard's shortcuts in the shortcut cheat sheet.

Developed on our backlit ASTRA2 keyboard it is perfect for working in any lighting environments. With 5 selectable light levels, the ASTRA2 is optimal from day to night, from bright rooms to low lights, and it's controlled with just a tap of your finger. The keyboard features two USB 2.0 ports to enable you to connect e.g. your mouse, contour shuttle or a USB-dongle. We engineered one wire for the USB hub and a separate one for the keyboard. It's perfect for editing systems that use USB KVM extenders as well as installations that require data security.

This dedicated Logickeyboard, also features all the regular letters, numbers, and symbol labelling that you will find on a conventional keyboard, it can simply be used as a substitute for it. Easy to set up and use. No software required.
