

Lumens VC-B11U

ProdCode: LUMVCB11U

Zoom Certified Video Conference Webcam

[\[Download Images\]](#) (.zip file)

Features

- **Zoom Certified** Video Conference Webcam
- Clear images with 4K sensor, fixed-lens, and WDR
- Effectively capture human voice up to 5 meters
- Hands-free auto framing to include all participants in a perfect view
- Easily control the camera by a mini remote controller or software
- Compatible with leading UC platforms and wireless presentation tools

UC and VC Integration

Certified by **Zoom** and compliant with **Barco ClickShare Conference**, the VC-B11U is compliant with all major video conferencing applications and unified collaboration platforms. It can even be used as a live video source within live production and streaming tools such as **YouTube Live**, **vMix**, and **OBS Broadcast**.

Pro Quality

The Lumens VC-B11U is a professional grade USB camera designed for small to

medium sized meeting rooms. Equipped with a 4K sensor, advanced image processing and reliable auto-focus, the camera outputs perfectly exposed video images enabling small groups to communicate effectively with remote teams. Featuring WDR (wide dynamic range) technology, the unit ensures that each participant is clearly visible on screen, even in difficult lighting conditions.

Auto-Configuration

The VC-B11U's auto-framing function immediately detects participants in a meeting. It dynamically adjusts its frame of angle to include all delegates, re-framing the view if participants join or leave during the meeting. There's no need for a remote controller to set the field of view – it's all automatically taken care of by the camera.

Sound

The camera's dual microphones are designed to pick up voices from up to 5 meters distance. This makes the VC-B11U suitable for sharing round table meetings or discussions in conference breakout rooms.
