

Slidekamera MONOHEAD Studio

ProdCode: MRMCHGN14v2

Reinforced 1-axis remote head (PAN only) for cameras up to 16kg

[\[Download Images\]](#) (.zip file)

Features

- Reinforced 1-axis remote head (PAN only) for cameras up to 16kg
- Unified head mount, compatible with SLIDEKAMERA's heavy sliders (the TITAN slider and ATLAS MODULAR), as well as our jibs and tripods
- MONOHEAD STUDIO can be used with all Slidekamera controllers
- High-Quality Connectors

Users well received the concept of a 1-axis remote head. Its capabilities have been expanded to increase the performance and make it compatible with our other flagship products.

REINFORCED GEAR

MONOHEAD Studio is equipped with a reinforced panorama gear, known from our STUDIO series 2D heads, like the [BULLHEAD Studio](#). The larger gearbox increases the stability and allows the user to work with heavier cameras. The head's rigidity opens new ways for utilising the product - you can use it as a rotating device for scenography or lighting.

UNIFIED HEAD MOUNT

The MONOHEAD Studio received our unified head mount, compatible with Slidekamera heavy sliders (the TITAN slider and ATLAS MODULAR), as well as our jibs and tripods. This ensures that the head is mounted firmly and allows to attach the unit safely in an upside-down configuration.

HIGH-QUALITY CONNECTORS

Our new lineup of devices uses heavy-duty LEMO connectors. The new design includes power and data connections in one cable, which allows you to work faster and safer - without tangling the unnecessary wires.

The connectors are compatible with a wide range of AC adaptors, from small chargers for one device to large power bricks with communication modules designed for big setups.

CONTROLLER

You can use the MONOHEAD STUDIO with all our controllers: from simple, but powerful AION IQ and advanced KAIROS, to network adapters that allow you to work with advanced computer software, like DRAGONFRAME and SLIDEKAMERA's Slideye 2.0.

AION IQ

AION IQ is the basic controller that works with 2-axis setup, e.g. the slider and MONOHEAD STUDIO. It offers all standard modes:

- LIVE
- LOOP
- RECORD/PLAYBACK
- TIMELAPSE
- ANIMATION (stop motion)

For shooting interviews or recording live shows, MONOHEAD Studio is a perfect solution that automates the camera's motion. The PARALLAX feature ensures that the filmed object will remain in the right spot in the frame. You don't have to worry about the parallax effect or missed compositions.

In the box:

- MONOHEAD STUDIO 1-axis remote head
 - AKC-3 quick release system
-

- Transport case
 - LEMO cable (selected length)
-

Need Further Support?

If you have any questions or require additional support regarding this product release, please do not hesitate to contact us. Our team is here to assist you with any inquiries or provide further information or marketing collateral as needed.
