

Slidekamera ATLAS MODULAR

ProdCode: MRMCHM1

Modular Slider System

[\[Download Images\]](#) (.zip file)

Features

- Modular Slider System
- Upgradeable and expandable
- Heavyweight - up to 40kg
- Unlimited length (recommended up to 12m)
- Precise mechanics

A unique system of rail sections that allows you to create custom length tracks to meet every filmmaker's needs.

CONSTRUCTION

The truss construction guarantees strength and rigidity of the set in all directions and allows to mount a standard 2m rails set on two tripods without any deflection.

MODULARITY

ATLAS MODULAR SLIDER comes with 0.8m and 1.2m sections, but 2m and 3m

sections are also available. The maximum recommended length is 12 meters.

The modular system is designed to be assembled and disassembled without any tools.

Each section is equipped with feet, that can be easily and quickly adjusted to any surface. You can perfectly level the set on the ground in no time.

EXTREMELY VERSATILE

When working in small spaces, or when you simply need a short track for your camera, you can use only one rail section mounted on one tripod.

Depending on the weight of your camera, you can use DUAL SUPPORT - additional accessory, that guarantees the rigidity of your setup.

SIDE BRACKETS

The side brackets come with magnetic bumpers, that act as brakes when the cart approaches the end of the slider, prompting you about the incoming end of the working range. This allows you to focus on capturing the best image, instead of worrying about the remaining range of the slider.

ATLAS MODULAR DOLLY MK2
