

Slidekamera Power Supply Unit 185W

ProdCode: MRMCHPB2

Power Supply Unit 185W

[\[Download Images\]](#) (.zip file)

Features

- Power Supply Unit 185W
- Power Supply Unit for single device - slider drive or remote head
- Suitable for devices up to 185W

UNIVERSAL POWER SOURCE

A robust power adapter with a power output of up to 185W will run motion control devices with up to two axes, e.g. a slider with 1-axis remote head or a single 2-axis head.

Thanks to the wide input voltage range (100-240V), you won't need to worry about separate power bricks during worldwide travels. The universal IEC C14 inlet will help you find a suitable power cable, even in the most exotic locations.

MOTION CONTROL SIMPLIFIED

No need for separate cables for power and data. There's only one robust wire with professional, heavy-duty plugs.

All you have to do is daisy-chain all your drives and enjoy the simplicity of the system.

The Power Supply Units are not regular AC chargers, they're a central hub of your motion control setup.

You can plug your controller directly into the PSU, and all your devices powered from that source are connected to the controller.

In the box:

- PSU 185 - AC adapter
 - 110/230V power cable
-

Need Further Support?
