

Slidekamera HEAVY GIANT Tripod

ProdCode: MRMCHT7

Reinforced fast, rigid, stable and reliable Tripod

[\[Download Images\]](#) (.zip file)

Features

- Reinforced fast, rigid, stable and reliable Tripod
- Ideal for jibs and heavy sliders
- Safety payload: 80kg
- Steel locking bolts
- Adjustable legs

The HEAVY GIANT Tripod is a reinforced version of the GIANT Tripod and is designed to carry payloads up to 80 kg. It's a perfect add-on to your jibs and heavy sliders - wherever you need stiff and sturdy support.

CENTRAL COLUMN

With the addition of a reinforcing central column, the HEAVY GIANT Tripod has increased payload and is less prone to twisting, which is very common when using large jibs and cranes. That increases the stability and smoothness of your motion.

EURO MOUNT

For our jibs, we recommend the EURO mount, an industry-standard solution, one of the fastest and most secure mountings.

TRIPOD LEGS

Double construction provides rigidity and stability for the tripod. Two large clamping knobs enable easy and stable height adjustment and secure against uncontrolled folding.

Steel locking bolts ensure safety at high loads.

FEET

Aluminium legs of the tripod are equipped with self-aligning feet that allow setting and stabilising the tripod on uneven ground.
