### Features

- Comfortably carries professional cameras, DSLR cameras and large binoculars
- Evenly distributes weight with curved neoprene pad
- Easily supports large, heavy equipment
- Stays in place with our Non Slip Grip™
- Easy to attach and fully adjustable
- Made in the USA

The Pro Strap™ range is rapidly becoming the choice of professional photographers and people who use large cameras with long heavy lenses. It's also ideal for use on portable power packs.

The patented weight reduction system makes equipment feel 50% lighter and 100% more comfortable. The weight is evenly dispersed while the strap functions as a shock absorber to eliminate neck and shoulder fatigue.

The Non Slip Grip™ adds the finishing touch which enables camera gear to be safely carried slung over the shoulder - you'll definitely feel the difference.

The Pro Loop Strap™ combines all the features of the Pro Strap™, but has a unique loop connection system for especially tight connection points. The strap loops through the connection area to form a slip knot which "falls" away freely from the camera when in use. A simple and extremely secure system you can trust!
