ProdCode: OPTE8350

Webbing harness for cameras and binoculars. Rec load 6.8kg

[\[Download Images\]](#) (.zip file)

Features

- Fits most cameras and binoculars
- Stabilises gear against body
- Enables gear to glide up and down strap during use
- Easy to attach and fully adjustable
- Available in both webbing and elastic versions
- Made in the USA

A perfect solution for the outdoor enthusiast seeking a simple harness system for cameras or binoculars. The Bino/Cam Harness™ self-adjusts to comfortably balance gear while in use or in the idle position against the body.

The unique loop attachment system enables the harness to quickly snap in place using our Uni-Loop quick disconnects (included with harness). These connectors can then be used on many other OP/TECH USA strap configurations.

The Bino/Cam Harness™ is available in either a webbing or elastic version. The webbing version is non-stretch. The elastic version allows your camera or binoculars to

be held tighter against the body in the idle position and stretches so the camera or binoculars can be comfortably brought up to the eyes for use.
