

## OpTech Scanner Classic Sling

**ProdCode: OPTE8370**

Shoulder, crossbody sling for warehouse scanners

[\[Download Images\]](#) (.zip file)

### Features

- Shoulder, crossbody sling for warehouse scanners
- Neoprene pad with non-skid surface backing for comfort and security
- Scanner glides freely up and down sling
- Scanner remains attached to the sling for security
- Breakaway connector releases for safety in an emergency with 8-10 lbs of force
- Extra Mini QD Loop Connectors™ available for additional scanners

The SCANNER CLASSIC SLING is ideal for warehouse workers who are boxing orders or stocking shelves at the floor level, with an effective range from about thigh-height to eye-height. It's great for situations where immediate access to the scanner is needed, while keeping both hands as free as possible.

The SCANNER CLASSIC SLING has all the features of our SCANNER SLING but with the addition of a neoprene shoulder pad for added comfort. The pad attaches to the sling using the same quick disconnect system with safety breakaway feature. It has bound edges and a non-skid surface backing to keep it in place on the shoulder.

It is fully adjustable to fit most any body size and shape. The scanner remains attached to the sling where it can freely glide up and down. The triglide stop adjuster keeps the scanner from slipping behind the body when in the lowered position. The quick disconnect holds the sling securely, yet will break away at 8-10 lbs of force for safety in an emergency situation. Two mini quick disconnects (included) remain on the scanner and can be fastened to the sling in just a couple of seconds for quick and easy access. Extra MINI QD LOOP CONNECTORS are available separately.

Comes packaged in a poly bag for convenience.
