

OpTech Scanner Sling

ProdCode: OPTE8371

Shoulder, crossbody sling for warehouse scanners

[\[Download Images\]](#) (.zip file)

Features

- Shoulder, crossbody sling for warehouse scanners
- Scanner glides freely up and down sling
- Scanner remains attached to the sling for security
- Breakaway connector releases for safety in an emergency with 8-10 lbs of force
- Extra Mini QD Loop Connectors™ available for additional scanners

The SCANNER SLING is ideal for warehouse workers who are boxing orders or stocking shelves at the floor level, with an effective range from about thigh-height to eye-height. It's great for situations where immediate access to the scanner is needed, while keeping both hands as free as possible. It can be worn on either shoulder for right-handed or left-handed use.

The SCANNER SLING is fully adjustable to fit most any body size and shape. The scanner remains attached to the sling where it can freely glide up and down. The quick disconnect holds the sling securely, yet will break away at 8-10 lbs of force for safety in an emergency situation. Two Mini QD Loop Connectors™ (included) remain on the

scanner and can be fastened to the sling in just a couple of seconds for quick and easy access. Extra Mini QD Loop Connectors™ are available separately, allowing the sling to be used with multiple scanners.

Comes packaged in a poly bag for convenience.

For extra comfort while working, we also offer the [SCANNER CLASSIC SLING](#) which has the same great features as the SCANNER SLING but with the addition of a neoprene shoulder pad.
