

## OpTech Uni-Loop Connectors - X-Long

**ProdCode: OPTE8474**

1/4" Uni Loop connectors for Quick Disconnect straps. Length 5"

[\[Download Images\]](#) (.zip file)

### Features

- Enables cameras or binoculars to be used interchangeably with OP/TECH USA neck straps, wrist straps
- Minimizes the amount of strap left on the camera when the main pad is removed
- Fits tight connection areas using a loop of 1/4" tubular nylon webbing
- Sold in sets of two
- Made in the USA

The System Connectors - Uni-Loop™ allow a camera or binoculars to be used with several neck straps, wrist straps or harness systems. The Uni-Loops™ are available in sets of two, with one male and one female connection.

The OP/TECH USA Uni Loop™ XL's extra-long 5" (12.7 cm) size is 1.5" (3.8 cm) longer than the regular Uni-Loop™ and allows even greater flexibility while shooting with interchangeable strap systems. The System Connectors™ – Uni Loop XL gives photographers a little extra slack when they need a bit more room to handle their gear.

When using them with the popular OP/TECH USA Utility Sling™ or Double Sling™ harness, it acts as a short “tether” between the camera and the connection point to the sling or harness. This can make it even easier to get the camera into position for those shots that come and go before you know it!

The System Connectors™ – Uni Loop XL is made with very strong tubular-weave nylon webbing sewn to a rugged leather retainer. The quick disconnects fasten quickly and securely to any OP/TECH USA professional series camera strap or harness. The two connectors can also fasten to one another to create a quick and easy hand strap! Discover a whole new level of freedom today with the OP/TECH USA System Connectors™ - Uni Loop XL. Proudly made in the USA!
