

Panasonic AK-PLV100

ProdCode: PANAKPLV100GSJ

4K PL-Mount Studio Camera for Live Cinematic Video with Shallow Depth of Field

[\[Download Images\]](#) (.zip file)

Features

- **Large Format Sensor and PL Mount for Various Expression**
This 4K studio camera from Panasonic is equipped with a 5.7K Super 35mm sensor and PL mount, inheriting the design concept of our VariCam camera, allowing for powerfully expressive live cinematic video closer to creator's intention with a shallow depth of field.
 - **Simple IP-based Live Production without CCU**
SMPTE ST2110 input/output is possible directly from the AK-PLV100GSJ camera head without connecting to a CCU,* enabling IP-based live production with just the camera, doing away with the need for complicated systems. It is also possible to output 12G-SDI signals directly from the camera head, allowing for flexible system construction and wide-ranging operations.
 - **Camera Head Can be Switched Anytime to Capture What you Want**
The camera head is fully compatible with equipment in Panasonic's 2/3-inch studio-camera system. By simply replacing the existing camera head with the AK-PLV100GSJ, cinematic video can be created with the existing CCU (AK-UCU600 or AK-HCU250).
