

Panasonic AW-UE150AKEJ

ProdCode: PANAWUE150AKEJ

4K Integrated PTZ Camera - Black

[\[Download Images\]](#) (.zip file)

Features

- 4K Integrated PTZ Camera
- High-sensitivity 1.0-type sensor supports 4K/60p recording
- Supports multiple transmission protocols, including NDI® High Bandwidth for low-latency 4K video.
- Built-in auto-tracking for flexible shooting
- Optical Low-pass Filter for Superior Image Quality that reduces luminance and colour moiré when filming monitors or LED walls

The AW-UE150A 4K PTZ camera has been designed to meet the needs of professional broadcasters and content creators, delivering advanced video quality, operability and efficiency in studio-based video productions.

The UE150A supports the NDI® High Bandwidth* protocol, enabling seamless IP-based, low-latency 4K video transmission. This is in addition to existing support for SRT and NDI® HX2 protocols, ensuring steady performance in unstable network conditions.

It is also compatible with 12G-SDI, 2x 3G-SDI, HDMI, and fibre output formats. This enables the UE150AW/AK to be easily integrated into a variety of on-site production systems, making it the perfect choice for both remote production and live streaming environments.

Exceptional performance and high-quality video

Equipped with a high-sensitivity 1.0-type 4K MOS sensor, Panasonic's UE150AW/AK delivers high quality video. Its wide-angle lens (75.1° horizontal), 20x optical zoom, and built-in auto-tracking functionality make it the ideal choice for a versatile range of installations.

The UE150AW/AK features an optical low-pass filter (OLPF) that reduces luminance and colour moiré when filming monitors or LED walls, whilst HDR (HLG) compatibility delivers true-to-life image reproduction.

Its enhanced Optical Image Stabilizer (OIS) minimises image shake during pan and tilt operations, and upgraded synchronisation of pan, tilt and zoom presets for a smoother camera operation.

Increased compatibility for any environment

The UE150AW/AK is compatible with Panasonic's AK-HRP1010GJ/HRP1015GJ Remote Operation Panel for seamless colour matching with studio cameras, increasing overall versatility and functionality within broadcasting setups.

Need Further Support?

If you have any questions or require additional support regarding this product release, please do not hesitate to contact us. Our team is here to assist you with any inquiries or provide further information or marketing collateral as needed.
