

# PGYTECH DJI Osmo Pocket and Pocket 2 VND Filter (6 to 9-Stop)

**ProdCode: PGYP19C070**

VND Filter (6 to 9-Stop) for DJI Osmo Pocket/Pocket 2

[\[Download Images\]](#) (.zip file)

## Features

- Filters for DJI Osmo Pocket/Pocket 2
- High definition image
- Magnetic quick snap on the Osmo Pocket / Pocket 2 lens
- Scratch, dust and oil-resistant
- Light yet robust

## Osmo Pocket / Pocket 2 ND Filter

**Photos:** It prevents overexposure and saturates colours, which is especially useful when capturing water mists or nighttime light trails.

**Videos:** It reduces the shutter speed to create smooth, cinematic videos.

## Osmo Pocket / Pocket 2 ND-PL Filter

- The Hybrid ND-CPL filter prevents unwanted reflections. It also saturates colours and improves image sharpness to create more vivid photos.

- It reduces the shutter speed and prevents overexposure to create smooth, cinematic videos.
- Rotate to change its polarizing effect.

### **Osmo Pocket / Pocket 2 CPL Filter**

- The CPL filter eliminates glare from reflective surfaces, such as water, snow or even glass windows. It increases colour saturation and image clarity to create more expressive and vivid photos.
- Rotate to change its polarizing effect.

### **Osmo Pocket / Pocket 2 UV Filter**

The filter has a hard coating that protects the lens by preventing UV light from entering the camera.

### **Osmo Pocket / Pocket 2 VND Filter**

Precise light control of your variable moments

#### **2-5 stops (ND4 - ND32) (Video)**

- Reduce light entering, to guarantee the right choice of exposure.
- For precise control shutter speed, making a fluent video.

#### **6-9 Stops(ND64 - ND512) (Long exposure, time-lapse)**

- Reduce light entering, to guarantee the right choice of exposure.
- Work in extremely bright conditions, to reduce the highlight and balance the light. Ideal for a longer exposure and increased motion blur.

### **Available in 2-5 or 6-9 stops for precise light control**

More Effective than four ND filters in one. Unlock the full light control of 2-5 or 6-9 stops in a more precise way. VND (2-5 stop): Select from the equivalents of ND4, ND8, ND16 and ND32.

VND (6-9 stop): Select from the equivalents of ND64, ND128, ND256 and ND512.

### **Ideal for on-the-go shoots**

Rather than waste time swapping out filters as the light changes, you can leave this one on and adjust it with a twist.

## **Extremely light and not affecting calibration**

CNC Aviation aluminium frame makes the filter extremely light, yet robust. It is carefully engineered to not affect your gimbal calibration.

## **High-definition images**

The filter uses German SCHOTT glass as its base material, which has been ground and polished multiple times to create a low refractive index for colour-accurate photo capture.

## **Water, oil and scratch-resistant**

The filter's double-sided, multi-layered coating repels water and oil, which makes it easy to keep clean. The filter's hard coating also makes it scratch-resistant.

## **Reduces reflection without colour shifts**

The filter's optical glass contains a reflection-reducing coating to maintain colour accuracy and balance.
