ProdCode: PGYP47B013

VND Filter (6 to 9-Stop) for DJI Osmo Pocket 3

[\[Download Images\]](#) (.zip file)

Features

- Filters for DJI Osmo Pocket 3
- Excellent water, stain and scratch resistance
- Effortless magnetic quick installation
- Lightweight, durable and stable flight performance
- High definition imaging
- Precision-crafted with Japanese AGC optical glass

CPL Filter (Professional)

CPL Filter eliminates glare from reflective surfaces, such as water, snow, or glass windows. It increases colour saturation and image clarity to create more expressive and vivid photos. Rotate to change its polarizing effect.

ND-PL Filter (Professional)

The Hybrid ND-PL Filter prevents unwanted reflections. It also saturates colours and improves image sharpness to create more vivid photos. It reduces the shutter speed

and prevents overexposure to create smooth, cinematic videos. Rotate to change its polarizing effect.

ND Filter

For photos, it prevents overexposure and saturates colours, which is especially useful when capturing water mists or nighttime light trails.

For videos, it reduces the shutter speed to create smooth, cinematic videos.

CPL Filter

The CPL Filter eliminates glare from reflective surfaces such as water, snow or glass windows. It increases colour saturation and image clarity to create more expressive and vivid photos. Rotate to change its polarizing effect.

VND Filter

- **2-5 Stops** - (ND4-ND32, Video)
Reduce light entering to guarantee the right exposure. Precisely control shutter speed to create smooth videos.
 - **6-9 Stops** (ND64 - ND512) (Long exposure, time-lapse)
Reduce the light that enters the lens to guarantee the right exposure. Works well in extremely bright conditions to reduce highlights and balance the overall lighting. Ideal for longer exposures and increased motion blurs.
