Landing Pad (Weighted - 3.5kg)

[\[Download Images\]](#) (.zip file)

Features

- Landing Pad (Weighted)
- The weight can resist wind without the need for ground nails
- Easily folded and carried
- Waterproof surface
- Easy-to-clean material;
- Protect your gimbal from damage and erosion
- Professional pattern

Let Large Drones Take Off and Land Smoothly

Using 600D thickened Nylon and heavy-duty steel ring, this landing pad weighs 1.5 kg(3.3 lbs)/3.5 kg(7.7 lbs), thus staying firmly on different terrains without the need for extra fixtures.

Waterproof Surface Keeps the Elements Out

The waterproof surface ensures your drone always stays dry and clean. Besides, it can

be easily wiped clean with a towel.

Keeps Flying Risks At Bay

A landing pad can effectively protect your gimbal from damage and erosion and keep dirt out of your drones.

Take It Wherever You Go And Set Up Quickly

The landing pad can be easily folded into a carry bag on your own for easy storage and transport.

Easily Spotted and Located From The Air

Bright colour and professional pattern design make it easy to see from the air and allow you to locate your landing spot quickly and accurately.
