- Sound effects
- Support for a broadcast-grade mic and headphones
- Virtual Surround Sound for headphones and stereo speaker systems
- Ergonomic design
- Customize Your Rig with the BRIDGE CAST App

## Pro Sound for Pro Gamers

Take online gaming sound to the next level with BRIDGE CAST, your all-in-one solution for premium livestream audio. This customizable desktop hub is packed with secret weapons to take out the competition, including dual sound mixes, vocal

transformer effects, music playback, sound effects, and support for a broadcast-grade mic and headphones. In the heat of the battle, BRIDGE CAST ensures that your audio is always as epic as your gameplay.

The companion BRIDGE CAST app takes your experience even further, allowing you to customize BRIDGE CAST audio features and enhance streams with royalty-free background music tracks and sound effects via BGM CAST and Roland Cloud.

## **Elevate Your Gaming Presence with Legendary Roland Technology**

BRIDGE CAST gives you what you need to deliver outstanding sound in every session, coupled with killer sonic tools to help you stand out from the crowd. Roland has been a leading innovator in electronic music and audio/video gear for over 50 years. With BRIDGE CAST on your desktop, you'll be driving your sound with the brand trusted by generations of top creators worldwide.

### **Fast and Easy Pre-Game Set Up**

1. Connect BRIDGE CAST to your gaming computer via USB-C.
2. Plug in a professional microphone to the XLR input.
3. Hook up your headphones.
4. Customize the audio and panel functions with the companion app.
5. Set up personal and stream mixes with the hands-on controls.

## **Amp Up Your Sound**

BRIDGE CAST lets you chat and interact using a broadcast-grade dynamic or condenser microphone, the foundation of any professional audio setup. The high-performance XLR mic preamp delivers clear, dynamic sound in the box, with no need for messy external add-ons. You get superior audio monitoring too, with a powerful headphone amplifier and high-sensitivity output for pro-quality phones. The versatile headphones connector also supports a headset mic for a quick, single-cable connection.

## **Personal Mix + Stream Mix**

With the dual audio mixer in BRIDGE CAST, you can independently balance the mic level, team chats, gameplay sounds, and background music for you and your viewers. Give yourself a winning advantage with a personal mix that prioritizes what you need to hear while gaming. Then create a separate stream mix that's perfectly balanced for maximum online engagement.

## **Direct Sound Control**

Along with a headphones output, BRIDGE CAST has a line output for external gaming speakers. Level knobs for each output let you easily control volumes and smoothly transition between phones and speakers during gameplay. There's also a dedicated streaming level control to dial in the sound for your online audience.

## **The Vocal Shapeshifter**

Morph your voice and become your character with fun processing derived from Roland's famous VT voice transformer products. Adjust the pitch and formant to change your age or gender. Or go even further and take on the persona of a beast or alien.

BRIDGE CAST also includes EQ, compression, and other pro vocal processing to level up your streams. A low-cut filter softens pesky "P" and "T" plosives, while the de-esser cleans up harsh "S" tones. There's a noise suppressor to throttle background distractions, plus reverb to launch your voice into another dimension. And with the muscular hardware DSP handling the audio load, all your computer power is dedicated to gaming and streaming.

## **Virtual Surround Sound**

Immerse yourself in 5.1 or 7.1 virtual surround sound for headphones and stereo speaker systems, powered by advanced Roland technology. Audio is converted from a PC to virtual surround sound via a USB connection, delivering a powerful and engaging sound experience.

## **The Audio Cheat Code**

Slay your competition by highlighting important game sounds with Game EQ presets. Pinpoint audio frequencies and boost their levels to make it easier to hear critical elements, like enemy footsteps in first-person shooter games. Once you find the ideal settings for different game titles, save them in onboard profiles and call them up with quick button presses while playing.

## **Command and Control**

The ergonomic BRIDGE CAST panel lets you easily control your mix while staying focused on the game. Everything you need is at your fingers, including grab-and-go level knobs and assignable buttons for muting sounds and accessing various functions. The rock-solid design won't move around on your desktop, and the discrete rear-panel connections keep clutter in check.

## Customize Your Rig with the BRIDGE CAST App

The powerful BRIDGE CAST app works in tandem with the hardware, giving you full access to an array of in-depth features. Dial in mic and audio parameters, configure Game EQ presets, and more. You can also re-assign hardware controls for your needs and save/recall custom BRIDGE CAST configurations for different games and streaming audiences.

## BGM CAST: Curated Music + Sound Effects

With BGM CAST, adding background music and sonic colour to streams has never been easier. Available through the BRIDGE CAST app and Roland Cloud, BGM CAST puts a growing selection of royalty-free background music and sound effects at your fingertips. Choose music by mood and genre or create playlists of your favorites for stress-free music management. You can also assign sound effects to the four hardware buttons for instant triggering.

A free Roland Account provides 36 background music tracks and 16 sound effects to use at no charge. Signing up for Roland Cloud Core membership through the BRIDGE CAST app unlocks thousands of additional music tracks and hundreds of sound effects, with new selections added each month. Membership also includes powerful tools for modern music creators, including the ZENOLOGY synthesizer, Zenbeats production software, Sound Packs, and more.
