- Autofocus, full frame, ultra wide-angle lens - Sony FE Mount
- Designed for E-mount full-frame mirrorless cameras with Sony E mount
- Delivers quiet, fast and accurate autofocus
- High resolution

Broaden Your Choice

The AF 14mm F2.8 FE lens is designed exclusively for mirrorless cameras with a closer distance between the sensor and lens compared to DSLRs to offer superior optical performance. With the 35mm format-based full-frame image sensor, it offers excellent image quality and beautiful background blur in addition to portable, convenient characteristics of mirrorless cameras. Furthermore, the 14mm focal length and ultra-wide angle of view of about 114° ensures the best result when it comes to broad landscapes and personalized snapshots.

113.9° Ultra Wide Angle

Ultra-wide angle allows to capture the creative space beyond what meets the eye and portray an expanded sense of dimension.

Minimized distortion and crystal image quality

Thanks to Samyang's exceptional optical technology, its compact size is packed with features for outstanding image quality. Featuring seven elements in six groups, two aspherical lenses and one high refractive lens plus Ultra Multi Coating to minimise aberration and unnecessary light dispersion, the lens delivers high resolution from the centre to the corners of the image.

Short M.O.D

With a minimum focal length of only 0.20m, it is possible to capture more vivid close-up images of portraits, pets, food, indoor and etc.

AF System

Faster and more accurate focusing ensures that fleeting moments are captured with utmost precision and clarity.

7 Aperture Blades

This lens is ideal for a variety of shooting situations such as portraits and night view of the city with its smooth out-focusing and beautiful bokeh effect.
